SUMMARY

Frontend Developer with 4+ years of extensive experience designing, building, and maintaining production-grade web applications using React.js, TypeScript, and modern front-end engineering practices. Adept at partnering with UI/UX designers to translate wireframes into elegant, performant, and accessible (WCAG) user interfaces. Proven track record in Agile environments, collaborating closely with cross-functional teams, establishing modern automated testing pipelines (Jest, Cypress), and mentoring junior engineers. Strong advocate for clean, secure-by-default code (SOLID, DRY) and driving continuous innovation in front-end architecture.

EXPERIENCE

Software Engineer | *TEKsystems*

04/2025 – Present

- Design and build high-quality, reusable, and scalable React components using TypeScript, ensuring strict adherence to SOLID, DRY, and component isolation principles.
- Partner with UX/UI designers and cross-functional Agile (Scrum/Kanban) teams to translate prototypes into responsive interfaces that are strictly consistent with the organization's design system.
- Integrate front-end applications with backend REST APIs, microservices, and event-driven architectures, actively troubleshooting performance, rendering, and UX issues across devices.
- Mentor junior engineers, lead technical front-end code reviews, and contribute to backlog refinement and task planning to deliver high-quality increments each sprint.
- Support the evolution of front-end architecture, advocating for user-centered design and evaluating patterns for state management, routing, and micro-frontend approaches.

Associate Software Engineer | *Cedcoss Technologies*

04/2022 – 02/2025

- Built and maintained maintainable UI components using React, Redux, Context API, and Zustand, optimizing front-end state management and complex client-side routing.
- Established and upheld modern quality engineering practices by writing comprehensive unit, integration, and end-to-end tests using Jest, React Testing Library, and Cypress.
- Supported and improved CI/CD pipelines for front-end applications, leveraging modern build tools (Webpack, Vite) to ensure reliable, automated deployments.
- Drove enhancements that improved performance (optimizing bundle size by 40%), maintainability, and developer experience (DX) across the organization.

Software Developer Intern | *Essentia Softserv*

01/2022 – 03/2022

- Developed responsive React components and improved cross-browser compatibility using HTML5, CSS3, and SCSS.
- Collaborated closely with backend engineers and QA teams to break down complex features and ensure stable code deployments.

TECHNICAL SKILLS

Languages & Core: JavaScript, TypeScript, React.js, Next.js, HTML5, CSS3, SCSS.

State Management & Data: Redux, Context API, Zustand, React Query, REST APIs, Microservices.

Architecture & Engineering: Component-based Architecture, Client-side Routing, SOLID & DRY Principles, Secure-by-default, Micro-frontend concepts, Performance Optimization.

Quality & Testing: Jest, React Testing Library, Cypress, Playwright, WCAG Accessibility.

Tools & Delivery: Webpack, Vite, CI/CD Pipelines, GitHub, Agile/Scrum/Kanban methodologies.

Styling & UI: Tailwind CSS, Material UI, Responsive Design, Mobile-First Design.

PROJECTS

- Workforce Experience

04/2025 – Present

WXP is an AI-powered digital employee experience (DEX) solution that integrates with various backend systems and devices to maximize IT efficiency, reduce costs, and enhance the employee experience.
- FormPay

04/2022 – 02/2025

Connect your favorite gateway with HubSpot using FormPay. Collect, track, manage and automate your one-time or recurring payment data within HubSpot, utilizing robust client-side routing and state management.
- Onboardify

05/2023 – 05/2024

Simplify and accelerate the employee onboarding process, from documentation to orientation. Eliminate paperwork with automated workflows, ensuring a smooth, accessible, and performant experience for new hires.

EDUCATION

- Master of Computer Applications (M.C.A) | Babasaheb Bhimrao Central University, Lucknow

2022

Score: 80%
- Bachelor of Computer Applications (B.C.A) | IIMT Group of Colleges, Meerut

2017

Score: 65%
